Forecast for Sunday 31 Mar 2024

Weather: A rather cloudy start, with cloud lowering and thickening during the afternoon. Outbreaks of light rain or drizzle possible, but most hills staying dry. Perhaps the odd clearer spell persisting in the south and west.

Chance of cloud-free hill tops above 600m: 30%, but 60% south and west.

Low cloud and visibility: Cloud becoming extensive to obscure hills above 700m in the east during the morning, but more scattered in the south and west. Areas of cloud lowering further to around 500m through the afternoon and evening. Good visibility beneath the cloud, but becoming poor in any drizzle.

Freezing Level*	1300m	1200m	1400m	1500m	1400m	1400m	1400m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite milder temperatures at lower levels, summits will be feeling a lot cooler, especially within cloud, with warm layers recommended. Navigation also becoming more difficult later in the day as cloud thickens and descends to lower levels.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 31 Mar 2024	2mm	4.8mm	17mm

Forecast for Monday 01 Apr 2024

Weather: Cloudy with showers throughout the day, heavy at times and with a risk of thunder. Some sunny spells likely between showers. Showers easing a little into the evening.

Maximum wind: Northeast 10-15 mph

Chance of cloud-free hill tops 600m: 30%, becoming 60% during the afternoon.

Low cloud and visibility: Cloud obscuring most hills and routes above 500m during the morning, but becoming patchier through the afternoon. Outside of cloud, visibility remaining moderate to poor due to any rain, but improving to be good during any brighter or drier intervals.

Temperature: **Valleys:** Plus 6 Celsius rising to Plus 12 Celsius
At 600m: Plus 4 Celsius rising to Plus 8 Celsius
Freezing level: Above summits
